

GRADING CRITERIA FOR TENTED CAMPS

Tented Camps are defined as accommodation establishments with fully serviced or self-catering facilities situated within a protected area and/or private game farm which primarily utilises outdoor activities to sell inclusive packages for guests. Outdoor activities are an integral part of the license. The camp and its facilities are usually for the exclusive use of resident guests. Camps have management plans and carrying capacities hence the number of their rooms is dependent on the carrying capacity of each site.

DETERMINING THE STAR RATING

All applications from establishments applying for grading will need to comply with the following to be eligible for a specific star rating:

- Compliance to minimum entrance requirements.
- Compliance to differential grading requirements.
 - <u>Note</u>: Detailed information on both the scheme entrance requirements and differential grading requirements are provided in Botswana's standards documents available for tented camps accommodation.
- The overall percentage score required for a specific grading band must be achieved in ;
 - Facility Criterions

This measures the cleanliness, quality, condition, adequacy and comfort in all areas.

Hospitality Criterions

This measures the range, proficiency and consistency of all guest services.

Responsible Tourism Criterions

This measures the properties level of success in implementing both sustainable and responsible tourism practices.

Best Practice Criterions

This measurement is applied against properties applying for a 3, 4 or 5 star rating and determines the level of excellence in implementing best practices.

All grading criteria have been developed to meet guest expectations for a specific star rating. Due to the increased emphasis placed by guests on key facilities or services, an internal weighting is applied to strengthen the consumer driven principle which underpins the criteria evaluation.

The individual nature and style / modus operandi of each establishment is taken into account for the criteria assessment. Where a facility or service is not provided, or specified as a grading requirement, it will not be assessed or form part of the overall rating / percentage.

The Grading Assessor thus awards a rating based on:

- o Whether the criteria is relevant to the establishment.
- According to the most closely matched descriptive content as specified in the grading criteria e.g. from unacceptable to outstanding.

 According to the level of compliance, a high or low rating is applied for all scores between Acceptable and Outstanding.

The score for each criterion is defined as follows:

GLOSSARY

The below phrases are used to signify ascending levels of quality and condition:

- Outstanding
- Excellent
- Very Good
- Good
- Acceptable
- Unacceptable

Star	Quality/Condition	Description	As	Assessment	
	Indicators			Scores	
5	Outstanding	Consistently exceeds	High	10
